Lazy W Jack A Boy R051 - Lot 51

Selling

**30 Yearling Black Angus Bulls • 8 Registered Yearling Black Angus Replacement Heifers
2 Commercial Yearling Black Angus Heifers • 3 Two-Year-Old Black Angus Bulls**

LAZY W ANGUS RANCH

PRODUCTION SALE

Sunday • April 23, 2017 • 2 p.m. (CDT)

At the ranch, 6681 77th St. NE, Cando, ND • (3 miles N of Jct. 281 & 17)

SALE LOCATION:

At the ranch 6681 77th St. NE, Cando, ND.
(3 miles N. of Jct. 17 and 281).

SALE DAY PHONES:

Tom Freund..... (701) 351-0096
Vern Frey, Frey Livestock Sales..... (701) 721-0344
Rod Geppert, American Angus Association..... (605) 295-3673
Dean Price..... (701) 351-3326

SALES REPRESENTATIVES:

Vern Frey, Frey Livestock Sales..... (701) 721-0344
Rod Geppert, American Angus Association..... (605) 295-3673
Dean Price..... (701) 351-3326

INSPECTION OF CATTLE:

Any time at the ranch.

HEALTH:

Bulls and heifers have had 7-way with Haemophilus and booster, Virashield 6 and booster, Pasturella Pneumonia vaccine and poured with Dectomax.

SUPPLEMENTAL INFORMATION:

Scrotal measurements and ultrasound data will be available sale day. Bulls will be semen tested and guaranteed breeders. Heifers will be pregnancy tested and guaranteed open.

DELIVERY:

Delivery arrangements can be made sale day. Free delivery for the first 300 miles and then for cost after that.

FEEDING:

Feeding arrangements after the sale will be \$2.50 per day.

GUARANTEE:

All bulls selling are guaranteed against breeding injury for the first breeding season. Breeding season is defined as the 90-day period following the first turnout of the bull. If a replacement bull is available and comparable, he will be provided or a full refund less salvage value. Bulls must be checked by a licensed veterinarian.

LIABILITY:

All persons who attend this sale do so at their own risk, legal or otherwise. The owner and the sale staff assume no liability for property loss or any accidents that may occur.

SALE TERMS & CONDITIONS:

Cash or good check. Cattle will sell under the suggested Terms and Conditions of the American Angus Association (http://www.angus.org/Pub/suggested_sale_terms.pdf). Except for those stated in the Terms and Conditions, there are no warranties either expressed or implied, as to the merchantability or fitness for a particular purpose, with respect to the cattle being sold at this auction. The warranties and guarantees set forth in the Terms and Conditions are in lieu of all other warranties, either expressed or implied and the remedies provided therein shall be the sole and exclusive remedy of the buyer, or any party claiming through the buyer, for any breach of warranty or guarantee therein provided and all other obligations or liabilities.

Buyers unable to attend the sale may send their bids to the sale representatives.

LUNCH:

Available at the ranch.

LAZY W ANGUS RANCH

6681 77th St. NE, Cando, ND 58324
www.lazywangusranch.com • lazyw@gondtc.com

Welcome to our annual bull and heifer production sale! We would like to take this opportunity to thank all of our past and future customers for having taken an interest in our program whether it be purchasing or just taking the time to look at the cattle. We would not be here if it were not for you!

It is with great pleasure that we offer you this fine set of bulls and heifers. It is our goal to raise bulls and heifers that will put growth, fertility, longevity and calving ease into their offspring while at the same time being nice to look at.

We feel that the bulls are long, deep and full of muscle while being sound on their feet and legs and in nice condition for breeding while not falling apart at the end of the year. The heifers are very feminine with plenty of length and growth that will benefit many livestock programs. The bulls will be semen tested and the heifers will be pregnancy tested and guaranteed open. A supplement sheet will be provided sale day with scrotal and ultrasound data.

Please feel free to call or stop by the ranch any time to visit or to look at the cattle.

It is our pleasure to answer any questions that you may have.

We hope to see you on Sunday, the 23rd of April, 2017 at our ranch at 2:00 pm (CDT). If you are unable to attend please give Rod Geppert (AAA Regional Rep.) Dean Price, or Vern Frey a call and they will help you pick out some outstanding bulls and heifers. We would love to assist in any way possible. Thank you so much for your business and may you have a profitable and fulfilling year.

Sincerely,
Lazy W Angus Ranch
Wayne, Marguerite and Jason Freund

Cousins having fun.

American Angus Association® Selection Tools

Expected Progeny Difference (EPD), is the prediction of how future progeny of each animal are expected to perform relative to the progeny of other animals listed in the database. EPDs are expressed in units of measure for the trait, plus or minus. Interim EPDs may appear on young animals when their performance has yet to be incorporated into the American Angus Association National Cattle Evaluation (NCE) procedures. This EPD will be preceded by an "I", and may or may not include the animal's own performance record for a particular trait, depending on its availability, appropriate contemporary grouping, or data edits needed for NCE.

Accuracy (ACC), is the reliability that can be placed on the EPD. An accuracy of close to 1.0 indicates higher reliability. Accuracy is impacted by the number of progeny and ancestral records included in the analysis.

GROWTH

Calving Ease Direct (CED), is expressed as a difference in percentage of unassisted births, with a higher value indicating greater calving ease in first-calf heifers. It predicts the average difference in ease with which a sire's calves will be born when he is bred to first-calf heifers.

Birth Weight EPD (BW), expressed in pounds, is a predictor of a sire's ability to transmit birth weight to his progeny compared to that of other sires.

Weaning Weight EPD (WW), expressed in pounds, is a predictor of a sire's ability to transmit weaning growth to his progeny compared to that of other sires.

Residual Average Daily Gain (RADG), feed efficiency expressed in pounds per day, is a predictor of a sire's genetic ability for post-weaning gain in future progeny compared to that of other sires, given a constant amount of feed consumed.

Yearling Weight EPD (YW), expressed in pounds, is a predictor of a sire's ability to transmit yearling growth to his progeny compared to that of other sires.

Yearling Height EPD (YH), is a predictor of a sire's ability to transmit yearling height, expressed in inches, compared to the that of other sires.

Scrotal Circumference EPD (SC), expressed in centimeters, is a predictor of the difference in transmitting ability for scrotal size compared to that of other sires.

Docility (DOC), is expressed as a difference in yearling cattle temperament, with a higher value indicating more favorable docility. It predicts the average difference of progeny from a sire in comparison with another sire's calves.

MATERNAL

Heifer Pregnancy (HP), is a selection tool to increase the probability or chance of a sire's daughters becoming pregnant as first-calf heifers during a normal breeding season. A higher EPD is the more favorable direction, and the EPD is reported in percentage units.

Calving Ease Maternal (CEM), is expressed as a difference in percentage of unassisted births with a higher value indicating greater calving ease in first-calf daughters. It predicts the average ease with which a sire's daughters will calve as first-calf heifers when compared to daughters of other sires.

Maternal Milk EPD (Milk), is a predictor of a sire's genetic merit for milk and mothering ability as expressed in his daughters compared to daughters of other sires. In other words, it is that part of a calf's weaning weight attributed to milk and mothering ability.

Mature Weight EPD (MW), expressed in pounds, is a predictor of the difference in mature weight of daughters of a sire compared to the daughters of other sires.

Mature Height EPD (MH), expressed in inches, is a predictor of the difference in mature height of a sire's daughters compared to daughters of other sires.

Cow Energy Value (\$EN), expressed in dollars savings per cow per year, assesses differences in cow energy requirements as an expected dollar savings difference in daughters of sires. A larger value is more favorable when comparing two animals (more dollars saved on feed energy expenses). Components for computing the cow \$EN savings difference include lactation energy requirements and energy costs associated with differences in mature cow size.

CARCASS

The genetic evaluation produces a single set of EPDs for carcass weight, marbling score, Ribeye area and fat thickness. The units of measure are in carcass trait format and analyzed on an age-constant basis.

Carcass Weight EPD (CW), expressed in pounds is a predictor of the differences in hot carcass weight of a sire's progeny compared to progeny of other sires.

Marbling EPD (Marb), expressed as a fraction of the difference in USDA marbling score of a sire's progeny compared to progeny of other sires.

Ribeye Area EPD (RE), expressed in square inches, is a predictor of the difference in ribeye area of a sire's progeny compared to progeny of other sires.

Fat Thickness EPD (Fat), expressed in inches, is a predictor of the differences in external fat thickness at the 12th rib (as measured between the 12th and 13th ribs) of a sire's progeny compared to progeny of other sires.

\$VALUE INDEXES

\$Value indexes, are multi-trait selection indexes to assist beef producers by adding simplicity to genetic selection decisions. \$Values are reported in dollars per head, where a higher value is more favorable. The \$Value is an estimate of how future progeny of each sire are expected to perform, on average, compared to progeny of other sires in the database if the sires were randomly mated to cows and if calves were exposed to the same environment.

Weaned Calf Value (\$W), an index value expressed in dollars per head, is the expected average difference in future progeny performance for pre-weaning merit. \$W includes both revenue and cost adjustments associated with differences in birth weight, weaning direct growth, maternal milk, and mature cow size.

Feedlot Value (\$F), an index value expressed in dollars per head, is the expected average difference in future progeny performance for postweaning merit compared to progeny of other sires.

Grid Value (\$G), an index value expressed in dollars per head, is the expected average difference in future progeny performance for carcass grid merit compared to progeny of other sires.

Quality Grade (\$QG) represents the quality grade segment of the economic advantage found in \$G. \$QG is intended for the specialized user wanting to place more emphasis on improving quality grade. The carcass marbling (Marb) EPD, which is influenced by carcass marbling scores and ultrasound percent intramuscular fat (% IMF) measurements, contribute to \$QG.

Yield Grade (\$YG) \$YG represents the yield grade segment of the economic advantage found in \$G. \$YG is intended for the specialized user wanting to place more emphasis on red meat yield. It provides a multi-trait approach to encompass ribeye, fat thickness and weight into an economic value for red meat yield.

\$G combines both \$QG and \$YG, and may be the best carcass decision tool for focusing on quality and red meat yield simultaneously.

Beef Value (\$B), an index value expressed in dollars per head, is the expected average difference in future progeny performance for postweaning and carcass value compared to progeny of other sires.
